Crossmark Steward Small-Mid Cap Enhanced Index Fund Fact Sheet

Investment Process:

The Fund employs a three-step process that combines small-mid cap style allocation with relative risk controlled portfolio construction and values screening policies:

- Determine the percentage of the Fund's assets that will be allocated to investments in both growth and value investment styles. These allocations will vary with market conditions.
- The small-mid cap universe is screened in accordance with the Fund's values policies, and those companies failing to meet these criteria are removed. The pure growth and pure value style components are identified within the investment universe.
- By using optimization techniques, construct a risk controlled portfolio that is designed to track the targeted style allocation.

Our Firm:

Crossmark Global Investments is an innovative investment management firm. The firm provides a full suite of investment management solutions to institutional investors, financial advisors and the clients they serve. We have a multi-decade legacy of specializing in responsible investment strategies for clients. Founded in 1987, the firm is headquartered in Houston, Texas.

Values-Based Screening Methodology:

The Fund applies a proprietary set of values screens to all of the investments. Screens applied to the portfolio management process allows investors to avoid owning securities in companies that choose to profit from businesses that are at odds with values-based investing.

Crossmark Steward Screens:

The Fund employs only avoidance screens and does not dilute the portfolio by seeking to invest in companies that promote any individual values or social issue.

This methodology gives the Fund the ability to serve a rapidly growing number of investors seeking competitive investment returns without compromising their personal convictions.

Screening Impact:

positive neutral **negative**

During the current quarter, the Steward Screens had a negative impact on the fund.
