Target-Date Strategies
Making empowered retirement investment choices can be as easy as knowing your targeted year of retirement. With Steward Target-Date Strategies, simply choose the strategy that corresponds with your retirement target date without any further decision-making required.

When starting out, young investors typically choose to invest a higher percentage in stock investments, which have a higher risk but typically provide greater long term returns. With age, investors generally decrease the percentage in stocks in favor of more conservative fixed income investments to protect earnings as they approach retirement. As the retirement years approach, target-date strategies periodically adjust to become more conservative.

Steward Target-Date Strategies, now offer premier quality, fully screened target-date funds with five diversified strategies for varying retirement target dates: Steward 2010, Steward 2020, Steward 2030, Steward 2040 and Steward 2050.

Investment Strategy
These strategies are built with a multi-asset class design to provide a stable return and manage long-term market volatility. These strategies will actively adjust the blend of US equities, international and fixed-income asset classes. An appropriate risk tolerance and return, based on the anticipated date of retirement, should be attained by the periodic blending and rebalancing of these asset classes. In addition to a disciplined asset allocation model, the strategies will be invested in professionally managed index mutual funds.

This methodology will hedge against poor investment manager selection and performance as well as keep investment cost low, providing the opportunity for better returns.

Values-based Screening Methodology
The Steward Funds apply a proprietary set of values screens to all of the investments. Screens applied to the portfolio management process allows investors to avoid owning securities in companies that choose to profit from businesses that are at odds with values-based investing. Steward screens include alcohol, gambling, life ethics, mature content, and tobacco. The Steward Fund employs only avoidance screens and does not dilute the portfolio by seeking to invest in companies that promote any individual values or social issue.

Portfolio Management
The Steward Target-Date Strategies are distributed by Crossmark Distributors, member and advised by Crossmark Global Investments, Inc. (Crossmark).
Target-date strategies automatically adjust the asset allocation, shifting the fund weight from stocks to bonds, as the target retirement date approaches.

### Performance History as of 6/30/19

- **Portfolio**
  - **Quarter-to-Date**: 2.27%
  - **Year-to-Date**: 7.89%
  - **Since Inception***: 4.66%

*Annualized. The Steward Fund is a unitized pool. Performance returns are historical and are calculated by determining the percentage change in the net asset value of all outstanding units valued at the end of the period. They include the reinvestment of all income. Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance may be lower or higher than quoted.
